

Meetup Project

Введение

Проект представляет собой адаптивную фронтенд-реализацию сервиса Meetup.

Него-блок на главной странице динамически подстраивается под высоту viewport на десктопе и использует градиентный фон.

Хедер построен на CSS Grid: строка поиска меняет своё положение на мобильных разрешениях.

Карточки событий адаптируются под экран: на мобильных устройствах изменяется порядок вывода информации, а badge Online Event перемещается в информации о событии.

Строка фильтров поддерживает горизонтальную прокрутку, если элементы не помещаются в ширину экрана, без переноса и потери доступности.

Тёмная и светлая темы реализованы через CSS-переменные цветов, переключение выполняется централизованно и сохраняется в localStorage.

Стили организованы в логически разделённую файловую структуру (globals, utilities, buttons, prose и т.д.), что упрощает поддержку и масштабирование проекта.

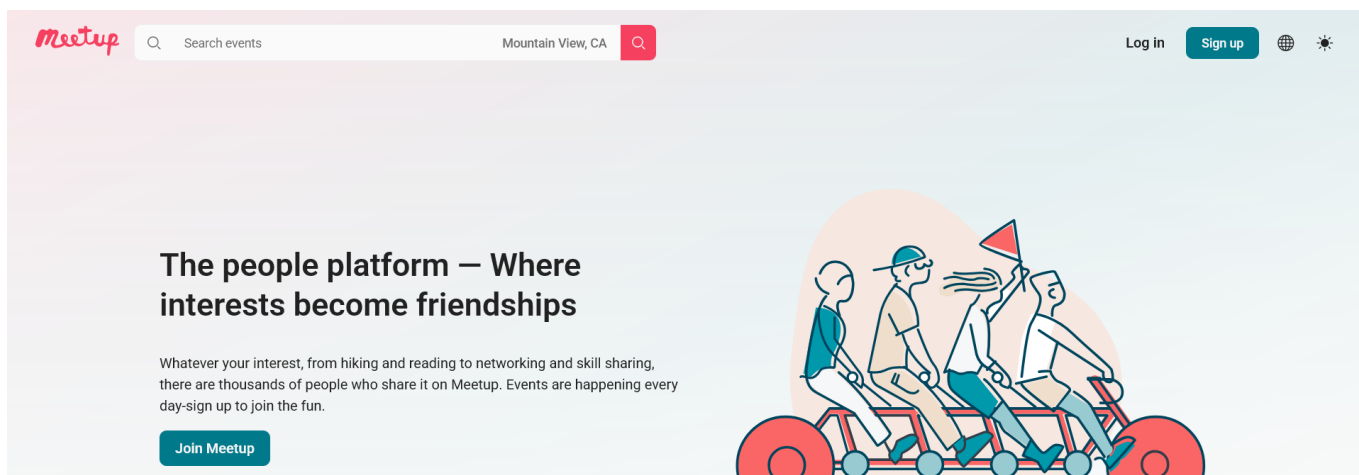

Проект полностью адаптивен, использует Grid и Flexbox, относительные единицы измерения и несколько брейкпоинтов для точной подстройки интерфейса под разные устройства и сценарии использования.

Дополнительно реализован динамический рендер данных и кастомные UI-элементы.

Проект демонстрирует:

- продуманную структуру компонентов,
- динамический рендер данных,
- адаптивную сетку,
- тёмную/светлую тему,
- кастомные UI-элементы (фильтры, карточки событий, поиск),

UI и стилизация

Принципы

- структурированные секции CSS,
- адаптивность через grid + flex, а также использование относительных единиц rem и em
- SVG-иконки (в том числе иконки библиотеки bootstrap)
- глобальные переменные CSS для цветов и размеров.

Адаптивность

- 1256px - скрытие карты, перестройка сеток
- 768px — перестройка сеток, уменьшение карточек
- 640px — перестройка хедера, мобильный layout событий (картинка слева, текст справа)
- Содержит также дополнительные брейкпоинты для более тонкой настройки некоторых элементов

Пример адаптивности секции `<header>`

```
.header-grid {  
  display: grid;  
  grid-template-columns: auto 1fr auto;  
  grid-template-areas: 'logo search actions';  
  align-items: center;  
  gap: 2rem;  
  width: 100%;  
}  
  
@media (max-width: 767px) {  
  .header-grid {  
    grid-template-columns: 1fr auto;  
    grid-template-areas:  
      'logo actions'  
      'search search';  
    row-gap: 0.75rem;  
  }  
}
```

Пример перестановки flex-элементов секции `.event-info`

```
@media (max-width: 767px) {  
  .event-info .time-date {  
    order: -1;  
    margin-bottom: 0.25rem;  
  }  
}
```

Технологии

- **HTML5**
- **CSS3** (Grid, Flexbox, CSS Variables)
- **JavaScript**
- **SVG**
- **LocalStorage**
- **Responsive Design**
